## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1–7, drawn to resolution-based proof of unsatisfiability using SAT, classified in class 716, subclass 5.
  - II. Claims 8, 9, 18–20, 22, 27, 28, 30–36, and 52–54 drawn to modeling of a circuit, classified in class 703, subclass 17.
  - III. Claims 10–17, 21, 23–26, 29, and 55–60, drawn to modeling of a circuit, classified in class 703, subclass 16.
  - IV. Claims 37–51, drawn to iterative abstraction, classified in class 716, subclass 2.
  - V. Claims 61–67, drawn to refining an abstract model, classified in class 716, subclass 2.
  - VI. Claims 68–74, drawn to verification, classified in class 716, subclass 5.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I–VI are directed to related processes. The related inventions are distinct if the (1) the inventions as claimed are either not capable of use together or can have a materially different design, mode of operation, function, or effect; (2) the inventions do not overlap in scope, i.e., are mutually exclusive; and (3) the inventions as claimed are not obvious variants. See MPEP § 806.05(j). In the instant case, the

Art Unit: 2123

inventions as claimed have a materially different design, mode of operation, function, and/or effect. Groups I and VI are drawn to distinct Design Verification processes. Groups II and III are drawn to distinct Circuit Modeling processes. Groups IV and V are drawn to distinct Optimization processes.

3. Furthermore, the inventions as claimed do not encompass overlapping subject matter and there is nothing of record to show them to be obvious variants.
4. Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction is not required because the inventions have acquired a separate status in the art in view of their different classification, restriction for examination purposes as indicated is proper.
5. Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction is not required because the inventions require a different field of search (see MPEP § 808.02), restriction for examination purposes as indicated is proper.
6. Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction is not required because the inventions have acquired a separate status in the art due to their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

7. A telephone call was made to Benjamin Lee at (609) 951-2522 on 10/31/06 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Juan C. Ochoa whose telephone number is (571) 272-2625. The examiner can normally be reached on 7:30AM - 4:00 PM.

Art Unit: 2123
